IntelliSIP[®] LTE EMERGENCY PHONE SERVICE

Phone service in 12-24 hours regardless of your situation.

When your business is interrupted by flood, fire, or storm damage you need to get back operating immediately. *IntelliSIP LTE™* uses the cellular network to deliver calls. No technicians or equipment required.

Immediate Deployment

Restore service in hours to your location. Or, integrate employee mobile phones for full "in-office" functionality like direct dial, conferencing, voicemail, hold, etc. directly on their devices.

Fully Functional Service

Voicemail, call forwarding, conference calling, custom routing, auto-attendant, online user/admin dashboard, local, long distance and international calling, call queues, voicemail to email, plus more.

100% wireless. No technicians. No wires.

Every situation is different. We have the solution to get you back in business tomorrow.

Is your phone equipment working but you don't have service?

We ship a pre-programmed, high-powered intelligent router to you overnight that installs out of the box. Phone service is restored in hours.

Is your phone system (PBX) not working?

We can typically provide a new hosted phone system and connect your numbers same day.

Is your internet service down?

Connect nearly any location to over the cellular network. Pre-programmed devices ship overnight.

Are you without power or your office is damaged?

Don't worry. We use advanced routing and the cellular network to keep you in service, with your own phone numbers. Our customers were 100% operational through Hurricanes Harvey and Irma.

How reliable is the service?

IntelliSIP LTE™ finds the strongest signal in your area across multiple carriers. *Cellular contract not required.* Plus, automatic failover to four backups delivers unprecedented reliability.
